Home Motion by Somfy...

Somfy, the world leader in the design and manufacture of specialized motors and electronic controls for interior and exterior window coverings, is committed to providing convenient solutions for day-to-day living. With Somfy products, users experience a better quality of life and have more time to enjoy life's daily pleasures. Tasks such as adjusting those hard-to-reach window coverings, controlling glare or protecting valuable furnishings from the sun are now simplified. At the touch of a button, window coverings can be instantly adjusted to changing activities or the varying sun conditions.

Turn the page - discover Home Motion by Somfy and how automated window coverings provide for greater convenience, comfort and control in everyday life...

Sonesse™

Putting your window coverings in motion...quietly

Somfy now offers noise reduction technology with the Sonesse™ motor range. Sonesse provides ultra-quiet operation for a variety of window coverings and is available with built-in Radio Technology Somfy® (RTS). RTS means shades can be operated from virtually anywhere in the house without direct line of sight. Similar to how a garage door opener operates, radio signals travel through walls and make it possible to control multiple coverings throughout the home alone or as a group.

Easily Adjust Hard-To-Reach Window Coverings

Somfy is your solution...

Now, at the touch of a button, hard-to-reach window coverings are simple to control. It's no longer necessary to climb into the bathtub, reach over furniture, step onto a stool in the kitchen or ascend a ladder in a two story foyer to adjust shades and blinds. The Telis Pure remote control is the perfect answer with a fresh clean look that matches any décor. It's so easy, it's Somfy!

Radio Technology Somfy®

Conveniently Manage Glare

Somfy is your solution...

Glare can be annoying while trying to watch your favorite television show, surf the web or read the morning paper. An ideal solution is to manage glare with a Somfy hand-held remote control. The Telis Lounge is available for the most sophisticated styles. At the simple touch of a button, shades and blinds will open or close to adjust to the changing sunlight in a room.

Effortlessly Adjust Window Coverings

Somfy is your solution...

Motorized window coverings solve the problem of trying to adjust large or heavy shades and provide ease of use for the elderly or handicapped. The tedious task of raising and lowering a group of coverings is now simplified with the Telis Composio. This 20 channel remote control features an on-screen display for easy navigation and offers the convenience of adjusting window coverings in multiple zones throughout the home.

Automatically Protect Furnishings

Somfy is your solution...

Many homeowners too often experience the damaging effects of the sun's UV rays on floor coverings, furniture, wall coverings and artwork. The Impresario Chronis is a timer that allows users to program specific times of the day to automatically adjust window coverings in different areas of the house, protecting interiors from the fading effects of direct sunlight.

Instantly Create Privacy

5 Channel
DecoFlex WireFree™ RTS

Somfy is your solution...

One touch privacy helps create the ideal environment whether preparing for a bath, relaxing in bed or enjoying time with the family at home. And with the battery powered DecoFlex WireFree™ RTS wall switch, window coverings may be controlled when entering or exiting a room, just like the lights. The switch may be seamlessly installed with-out wiring next to any light switch or stand alone, and is never misplaced.

Reduce Energy Costs

Somfy is your solution...

Having shades automatically raise or lower at certain times of the day helps to manage heat gain in summer months and heat loss during the winter—reducing monthly energy bills.

The Sunis Indoor WireFree RTS

is a sensor that uses the intensity of the sun to provide automatic control of window coverings. This feature optimizes room temperature levels as well as protects furnishings from harmful UV rays.

Chronis Timer
Radio Technology Somfy®

Increase Security

The Chronis combination timer wall switch may be programmed to automatically adjust window coverings at preset times throughout the day. This feature provides added security to an unoccupied home by creating a lived in look even while homeowners are away on vacation.

Control Options

Radio Technology Somfy® (RTS) Revolutionizing Home Comfort Control

Radio Technology Somfy® (RTS) means window coverings can be operated from virtually anywhere in the house without the need to point or aim the transmitter at shades/blinds. Similar to how a garage door operates, radio waves travel through walls giving users the capability of controlling their window coverings from a variety of rooms in the home. It's now possible to adjust shades in the kitchen from the couch in the living room.

Controls featuring Radio Technology Somfy® (RTS) enable users to operate their window coverings individually or as a group. Options include: hand-held remote controls, wireless wall switches and programmable timers.

Power Options

WireFree™ Battery Powered

Door windows, skylights and specific types of building construction may create a challenge in concealing unsightly power cords. The solution—Somfy's WireFree™ Battery Powered systems.

Somfy's patented battery technology powers a variety of window coverings that install in minutes. All Radio Technology Somfy® motors are compatible with a wide selection of controls: wireless wall switches, hand-held remotes, and automated timers.

Plug-In

For maintenance-free operation simply plug directly into standard household wall outlets. The thin power cord may be hidden behind draperies, side panels, top treatments, furniture or along window frame molding to preserve the décor of the room.

Integrated Home Control

Did you know window coverings powered by Somfy may be integrated with total home control systems? The same remote, touch-screen or wall panel which controls lighting, security, HVAC and audio video equipment can also adjust motorized window coverings. And with the flat screen trend transforming virtually any room in the house into a "home theater", motorized window coverings are becoming part of the norm. It's so easy it's Somfy!

Life Simplified...

Sheer Horizontal Shades

2" Horizontal Blinds

Roman/Woven Shades

Pleated/Cellular Shades

Roller/Solar Shades

Drapery

Somfy is your solution..

Window coverings powered by Somfy provide convenience, comfort and control—all at the touch of a button. Problems such as, glare control, privacy, security, protecting valuable furnishings and adjusting those hard-to-reach window coverings are now solved. No matter the application, Somfy has the solution.

Somfy motors can adapt to all types of interior window coverings. Roller/solar shades, pleated/cellular shades, 2" horizontal blinds, roman/woven shades, sheer horizontal shades or draperies. It's up to you.

Take comfort knowing Somfy's full range of motors and controls are backed by a 5 year warranty. So quality is guaranteed.

Home Motion by Somfy

Technology for residential applications is constantly progressing. Movements that seem natural to us, such as closing a blind manually by hand, are today considered old fashioned. Somfy has been developing window coverings motorization solutions for over thirty years, and has created the Home Motion by Somfy concept. By coordinating motors and electronic controls, Home Motion by Somfy provides users with a new choice of practical and reliable solutions.

- Easily adjust hard-to-reach window coverings
- Conveniently manage glare
- Effortlessly control large window coverings
- Automatically protect valuable furnishings
- Instantly create privacy
- Increase security
- Reduce energy costs

With a complete range of motors and controls, Home Motion by Somfy offers a variety of solutions, from the simplest to the most sophisticated.
